

EXPERIENCE TRUE ROOM FLEXIBILITY

Detach the audio from the furnishings

CEILING MOUNT FOR LARGE AND MULTIPURPOSE ROOMS

The ceiling mount option for Konftel 800 speakerphone solutions is an appealing alternative to traditional desktop placement. It addresses growing demand for smarter and more flexible room configurations. You can move furniture and rearrange the room every day without any technology hassle. Perfect for larger spaces and multipurpose rooms, where the daisy-chain capabilities of the Konftel 800 makes sure every inch of the room is covered.

A NEATER AND MORE COMFORTABLE EXPERIENCE

With the speakerphones mounted to the ceiling you're clearing the table from devices and cables, for a really neat and tidy room appearance. It also elevates the video meeting experience. The user can forget about where the microphone is placed and focus on the interaction with remote participants on the screen. The audio pick-up and distribution works its magic without anyone noticing. It all comes natural.

Perfect for classrooms and presentations in larger multi-purpose rooms.

A SMARTER WAY TO LECTURE

Connect an approved* wireless headset to the conference phone. The Konftel 800 supports Lecture Mode from software version 1.0.8.0.12. This gives the presenter total freedom of movement and position in the room. Everyone will hear clearly all the time.

While the presenter is speaking, the Konftel 800 will automatically mute all device microphones and only keep the headset microphone open. When the person stops talking, the speakerphone microphones are unmuted and all participants in the room can be heard. But through the headset, the remote participants can always be heard. Pretty smart, and a bit unique.

**The first release will only support the Jabra Engage 65. Support for other headsets will come with future firmware releases.*

Multipurpose rooms with classroom seating

A headset connected to a Konftel 800 placed on a sideboard and two additional Konftel 800 mounted in the ceiling.

*Perfect for
Lecture mode*
